Press Release July 30th 2018

€24 million investment in a new biorefinery at ZILS (Sines Industrial and Logistics Zone)

INEDITENEPTUNE, an InKemia business group company, from Spain, contracted with aicep Global Parques setting up a biorefinery to produce Class A Advanced Biodiesel at ZILS. In recent years InKemia has developed a new biofuel (S-50) with characteristics similar to those of diesel and biodiesel. The S-50 has crude glycerin as one of its main raw materials. The S-50 has been totally developed within the European Union and thoroughly tested, both in laboratory environment and in engines.

The company selected Portugal – ZILS, adjacent to the harbor of Sines – to locate the first industrial facility in the world to produce and market the S-50. The total investment will amount to nearly 24 million euros, generating 23 FTE and inducing between 15 to 20 indirect jobs.

The project will positively impact Portuguese exports, since it is estimated that over 70% of its annual 30,000 metric tons production will be for the Spanish, Italian, German, Dutch and UK markets.

The industrial facility will take up about one hectare of Lot E, Zone 1 of ZILS, a petrochemical industrial site managed by *aicep Portugal Global*:

About aicep Global Parques

aicep Global Parques is a company specialist in industrial plant management and business location services.

Our company is focused on delivering positive conditions to help our clients raise funds and subsequently manage the installation of national and overseas investment projects.

aicep Global Parques has three distinct business location solutions under direct management, which can host all types and sizes of projects: Zils Global Parques in Sines, BlueBiz Global Parques in Setúbal and Albiz Global Parques in Albarraque, Sintra municipality. ZILS – Sines Industrial and Logistics Zone has a clear Atlantic appeal and easy and fast access to national and international transit routes, due to its contiguity with the Harbor of Sines. Mainly an Energy cluster, for Oil & Gas, Zils Global Parques has 2,375ha of areas dedicated to industrial, logistics and service activities, hosting large companies such as Galp, Repsol and EDP.

The BlueBiz – Business Park of the Península de Setúbal is innovative and attractive for several sectors of activity, namely aeronautics, but also automobile logistics and agribusiness.

The Albiz – Sintra Business Park is oriented for business and logistics, offering competitive terms to SMEs.

aicep Global Parques also provides industrial localization and logistics services in all of Portugal.
